OUR  
SERVICES

# Digital printing Vinyl, Lamination Sewing and Shaping

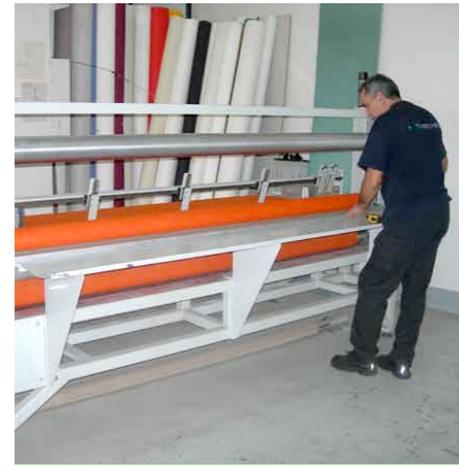

We have the right tools to achieve your visual communication and the experienced people for even your boldest projects.

# Locksmith, Carpentry Converting Painting

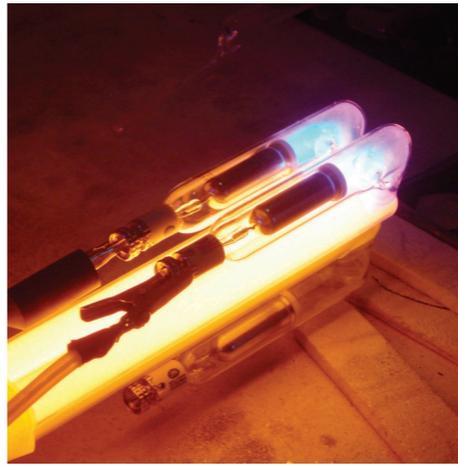

A thorough knowledge of the different stages of your project for optimal service.

# Prototype Study Mounting Electric Manufacturing neon Installation on site

Our skills are in the service of your creativity: from a sketch to the prototype, from the project to the achievement.

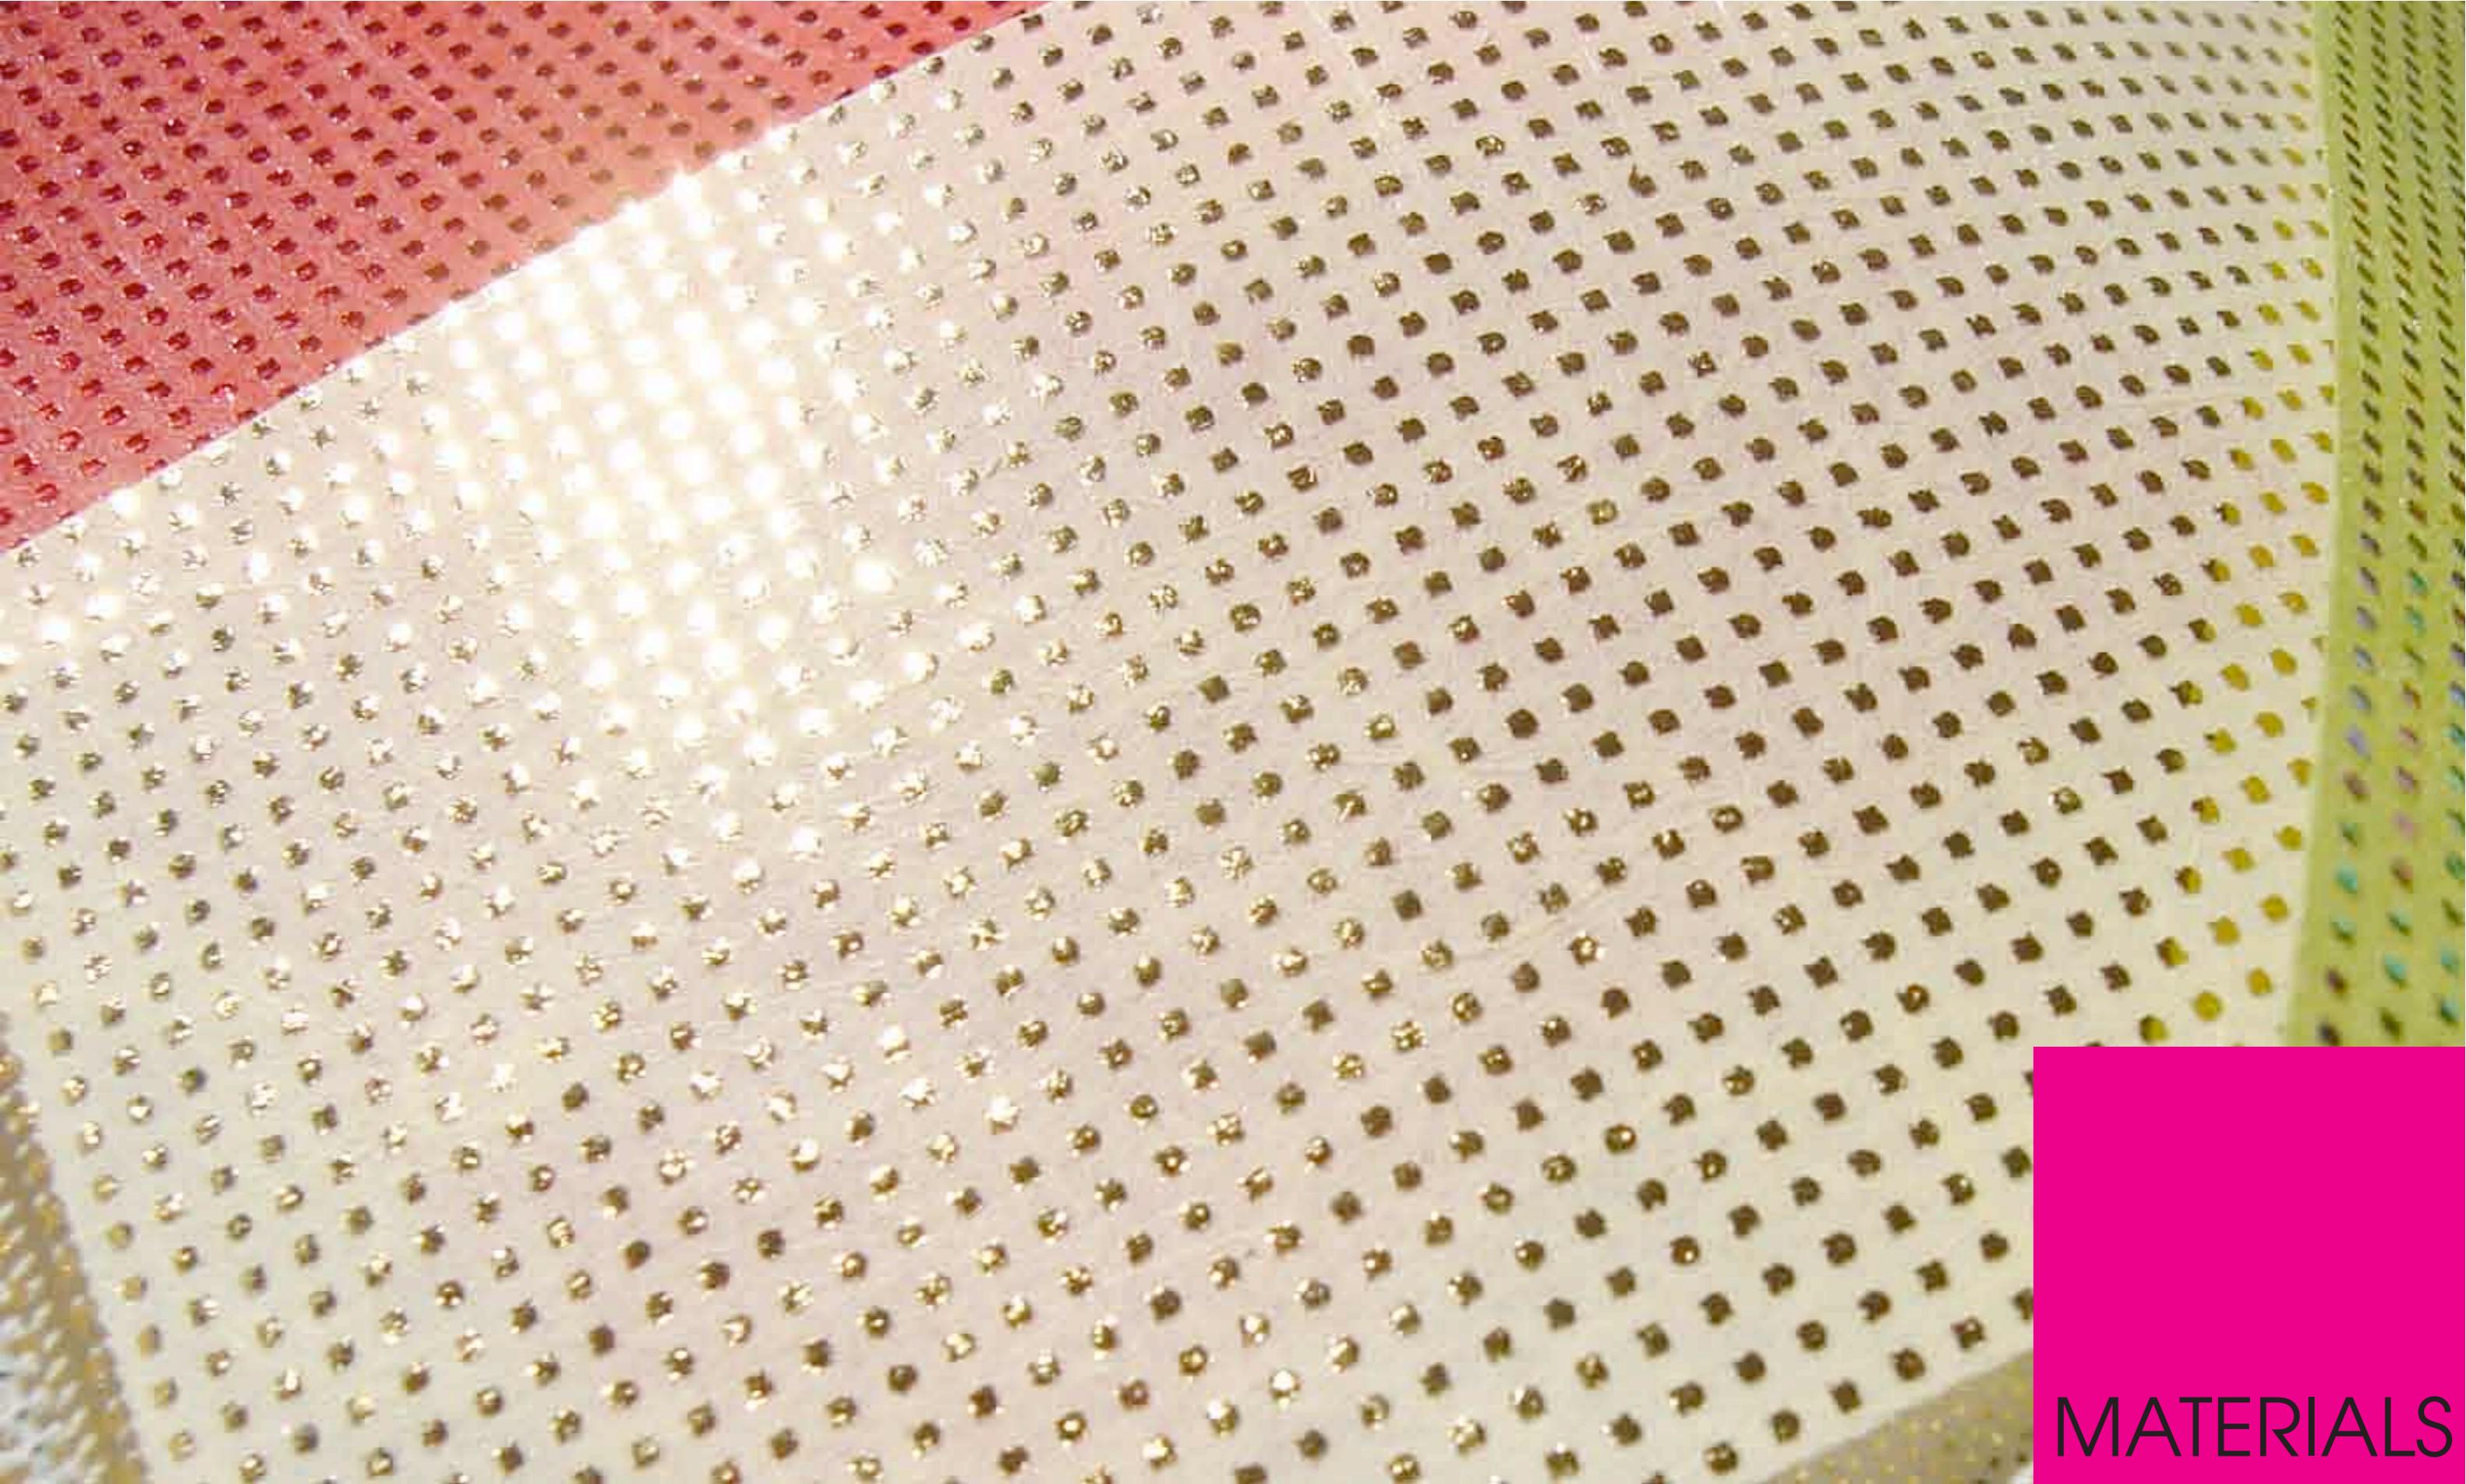

# Renting

We offer a large range of structures, systems and furniture for rent.

MATERIALS

# The best visual screen

Design : Palais de la Découverte avec le département d'Astronomie-Astrophysique

## The best visual screen

This non-woven is fire retardant (M1, B1, NFPA701) and available in white and 16 standard colours in 2,40 m wide (94 inches).

This is the ideal material to create interior screens thanks to its dimensional stability.

alacarte

## A wide colour range

A choice of 42 colours of Drop Paper 60gr/m<sup>2</sup> is now available, fire retardant (M1, B1, NFPA 701) and 1,60 m wide (63 inches).

Minimum order : 25 lm.

Delivery time : 10 working days.

DROPJET®

Perfect for digital printing

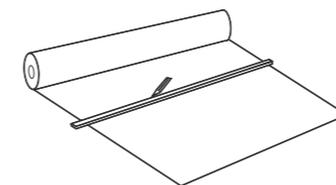

# DROPJET®

## Perfect digital printing

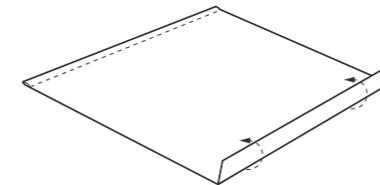

The Drop Paper has been adapted to digital printing technologies. It is available with or without fiberglass for a fibrous or smooth texture depending on the desired effect.

In each quality we have a version for water base or solvent printers.

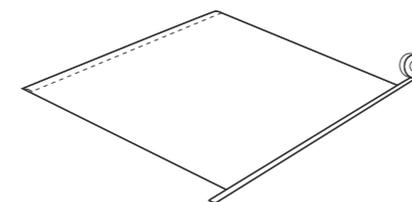

Widths available in rolls or cut:  
0,914 ; 1,27 m ; 1,372 ; 1,524 ; 2,40 m  
(36" ; 50" ; 54" ; 60" ; 94")

To cut the Drop Paper, use a metal ruler and a cutter.

To make a hem pocket, fold the Drop at 10 cm with the other side of the cutter (for the 25 mm ø aluminium tubes).

Open the fold and apply a double side adhesive tape 3M950.

DROPnet.

Subtle transparency

# DROPnet®

## Subtle transparency

Knitted Mesh textile semi-transparent, fire retardant (M1, B1, NFPA 701) to achieve light and subtle interior screens.

Thanks to its protective liner, it is compatible with any digital printers up to 1,524 m (60"). Drop Net® is also available in 2,40 m wide (94") without liner.

**NEW**  
**COTTON**  
100 % Natural

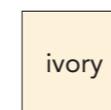

# NEW COTTON

## 100% Natural

This textile is 100% cotton, in 1.50m (59") wide is fire resistant (M1, B1) and suitable for digital printing in water base inks.

This natural material is really well adapted for interior decoration in permanent uses.

Colors :

 100 % recyclable cotton

**Flag**DROP®

Graduated opacity

# FlagDROP®

## Graduated opacity

Flag mesh is 100% recyclable, fire resistant (B1, M1) is adapted for digital printing and suitable for transparent effects.

Available in 1,50 m (59") with a protective liner for water base inks and 3,05 m and 5,00 m (120" and 196") for solvent inks.

 100 % recyclable polyester

SparkleDROP®

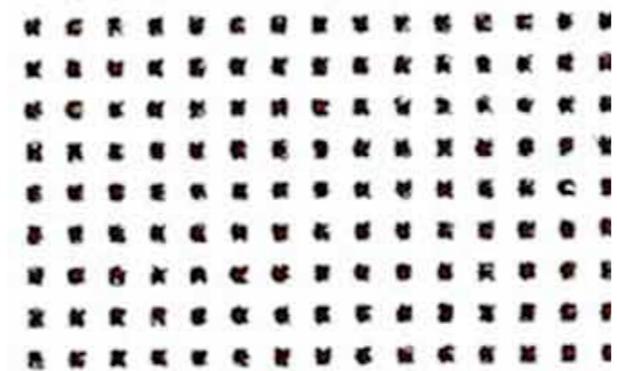

The Gold and Silver Version

## The Gold and Silver Version

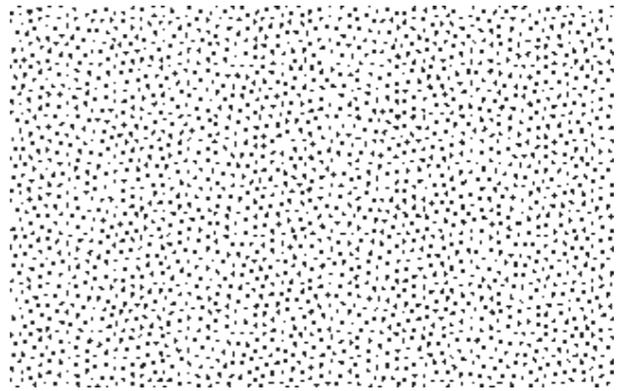

This metal finish on Drop Paper®, Drop Jet® and Drop Net® is available in 1,50 m wide (59"). This shiny media can offer different design and colours.

Standard colors; gold and silver on inventory. Other colours on demand.

Examples of designs:

Quadretti

Powder

WIND  
DROP®

Resists to any wind

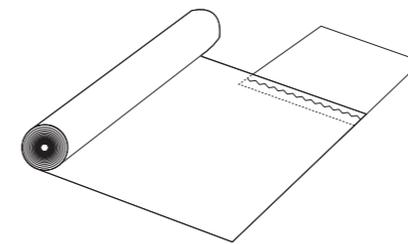

# WIND DROP®

## Resists to any wind

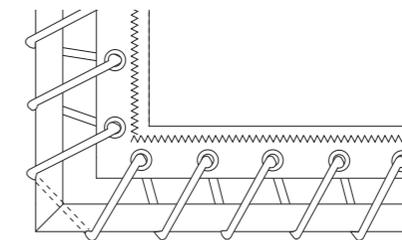

Non woven air transparent, for inkjet printing to achieve large outdoor banners.

Also fire resistant (M1, B1), Wind Drop® can be used for interior decoration. Maximum width: 2,20 m (86")

### MANUFACTURING WIND DROP®

Zig Zag stitching to join the surfaces.

Put eyelets over hems all around the surface.

Design : Jean Nouvel

CEILINGS

Design : General Motors

CEILINGS

# SMOKE OUT®

## The great masking

Stretchable knitted fabric made of Trevira, fire resistant (M1, B1, NFPA 701).

The melting lines every 30 cm (12") provide automatic opening to enable smoke to escape.

Colours in width of 2,80 m (110")

white

pearl  
grey

black

Demonstration of the technical process

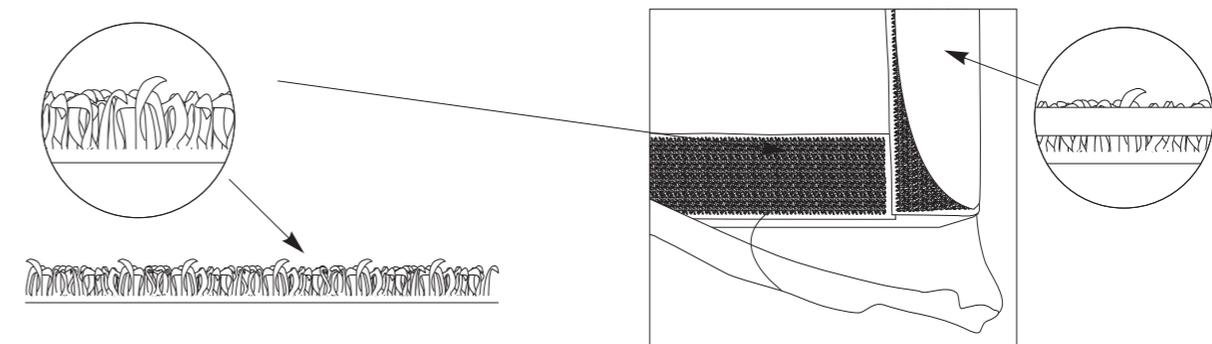

# SMOKE OUT®

## The great masking

Usual set up with staples on wood pieces.

Set up on aluminium frames with Velcro tape.

# The 3D M1 solution

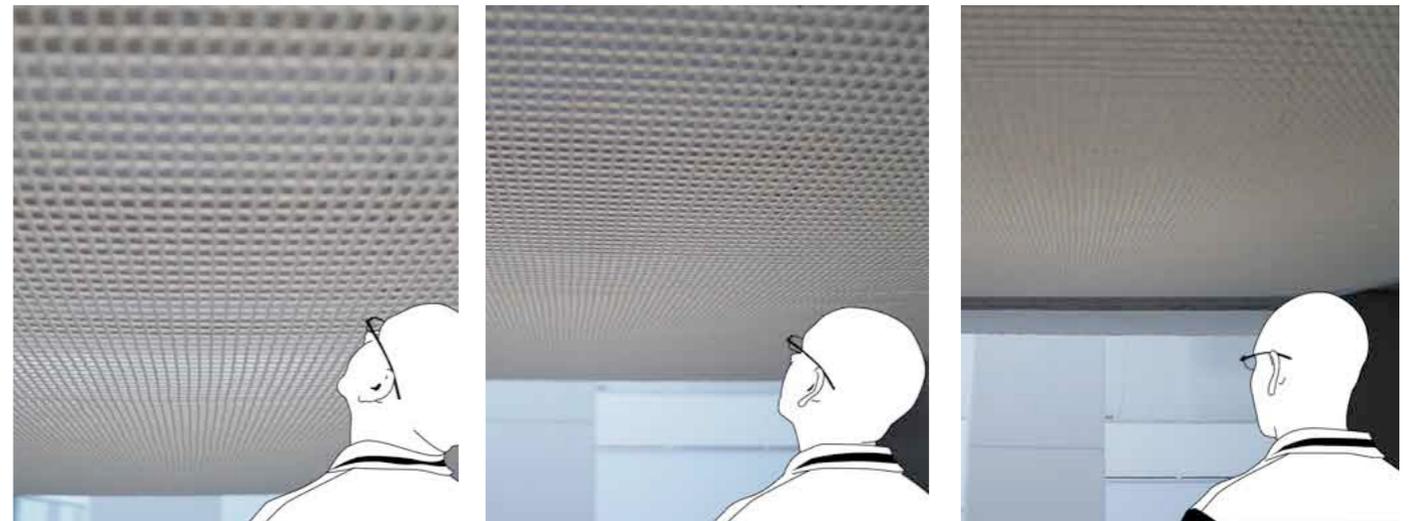

## The 3D M1 solution

3 dimension fabric with square open cells.

The height of the cells gives the masking effect while enabling smoke to escape and sprinklers to activate.

Fire retardant M1 and 3,05 m wide (120").  
Available in white.

# The mask of light

## The mask of light

The Paralume ceilings benefit from the Drop Paper qualities used to make a network of large vertical open cells.

- Obscured vision in any angle
- Respect of the security regulations
- Easy set up on upper structure
- Variation of translucency
- Graduation of lighting
- Three-dimensional option
- Laser Drop<sup>®</sup> option

Available soon

PLAFONDS  
**HONEYCOMB**  
CEILINGS

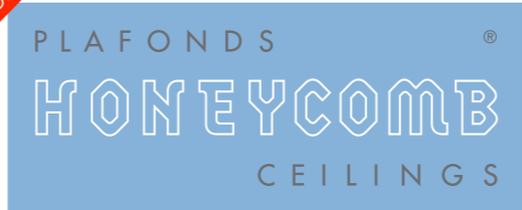

# The paper cells

CEILINGS

## The paper cells

Honeycomb ceiling® is a succession of honeycomb cells to mask any upper views of the exhibition halls.

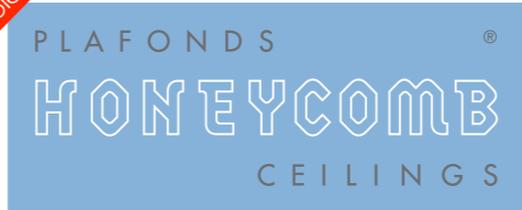

3 different dimensions :  
4 cm, 8cm 16 cm (1,5" - 3" - 6").

Available in 16 colours.

Available soon

## So many advantages for a ceiling

- Security ceiling
- So masking
- Light and elegant
- Diffusion of light
- Sound control
- Low volume
- Easy set up
- 3 different high levels
- A large range of colours
- International patents

CEILINGS

DROP<sup>®</sup>  
STRIPE

The high tension paper

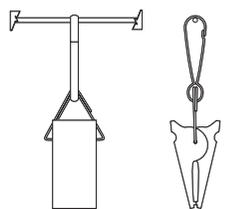

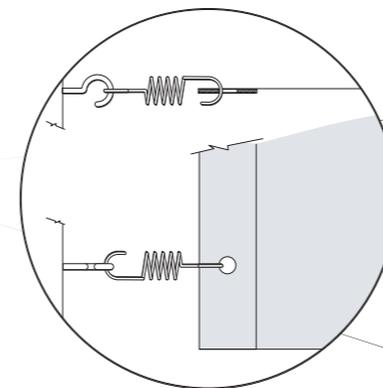

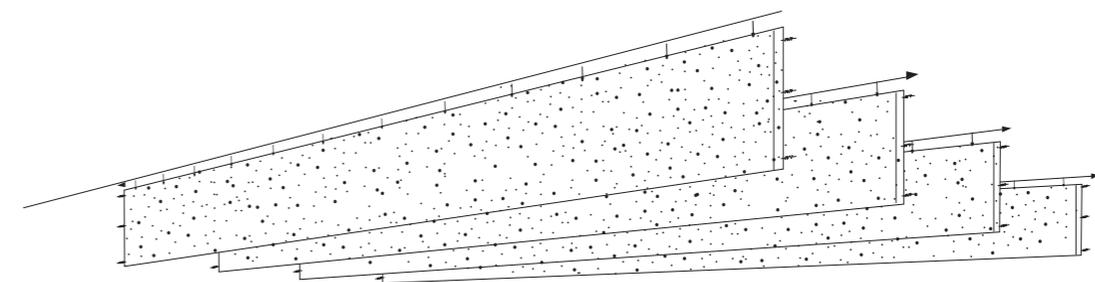

# DROP<sup>®</sup> S T R I P E

## The high tension paper

Ceiling system made of parallel stripes of Drop Paper stretched in a vertical plane. Compatible with any security systems, these stripes can also be used as graphic support.

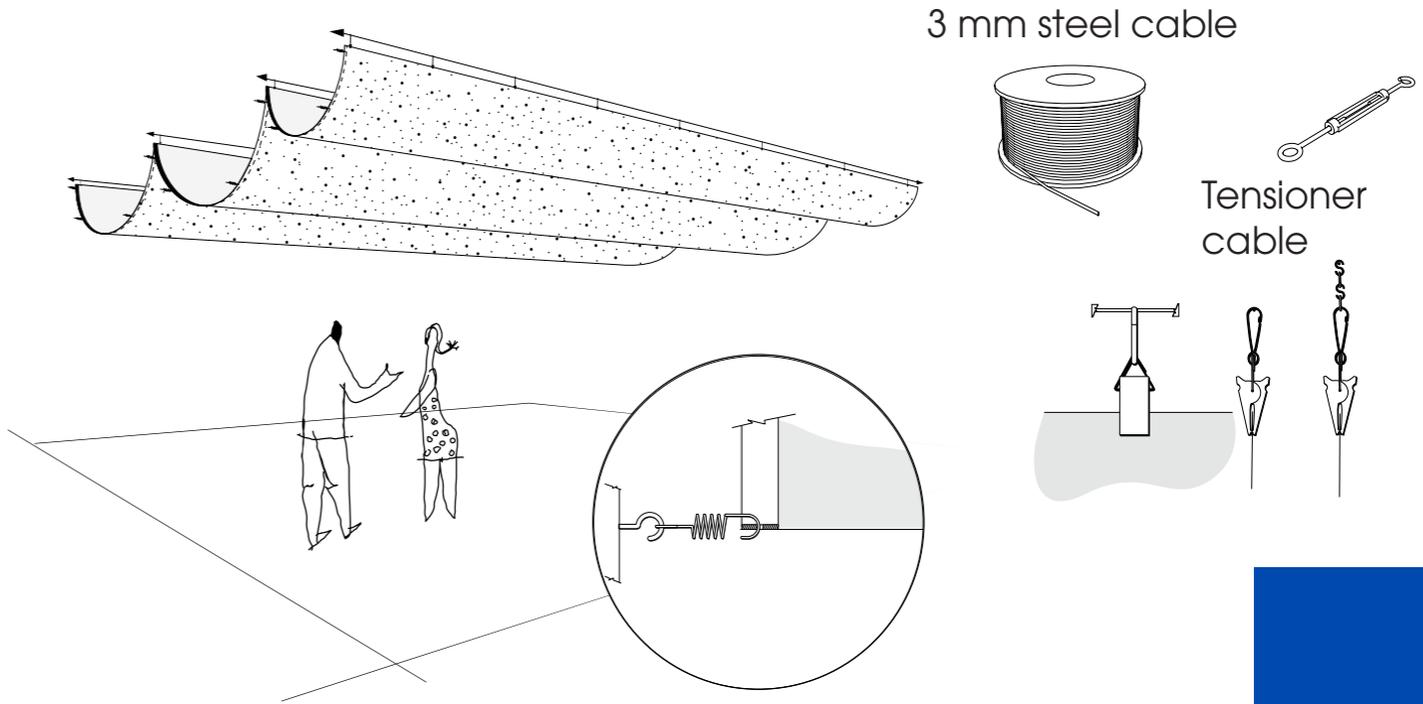

Special clips

# DROP. GONDOLA in length

## The high tension paper

Ceiling system made of Drop Paper stripes vaulted in half circle. Ends are stucked on a pre-vaulted aluminium stripe with holes and stretched with small springs to give a permanent tension. As for Drop Stripe, small clips hang the paper on a stretched upper steel cable every 60 cm (23").

Design : Claude Bellarbre

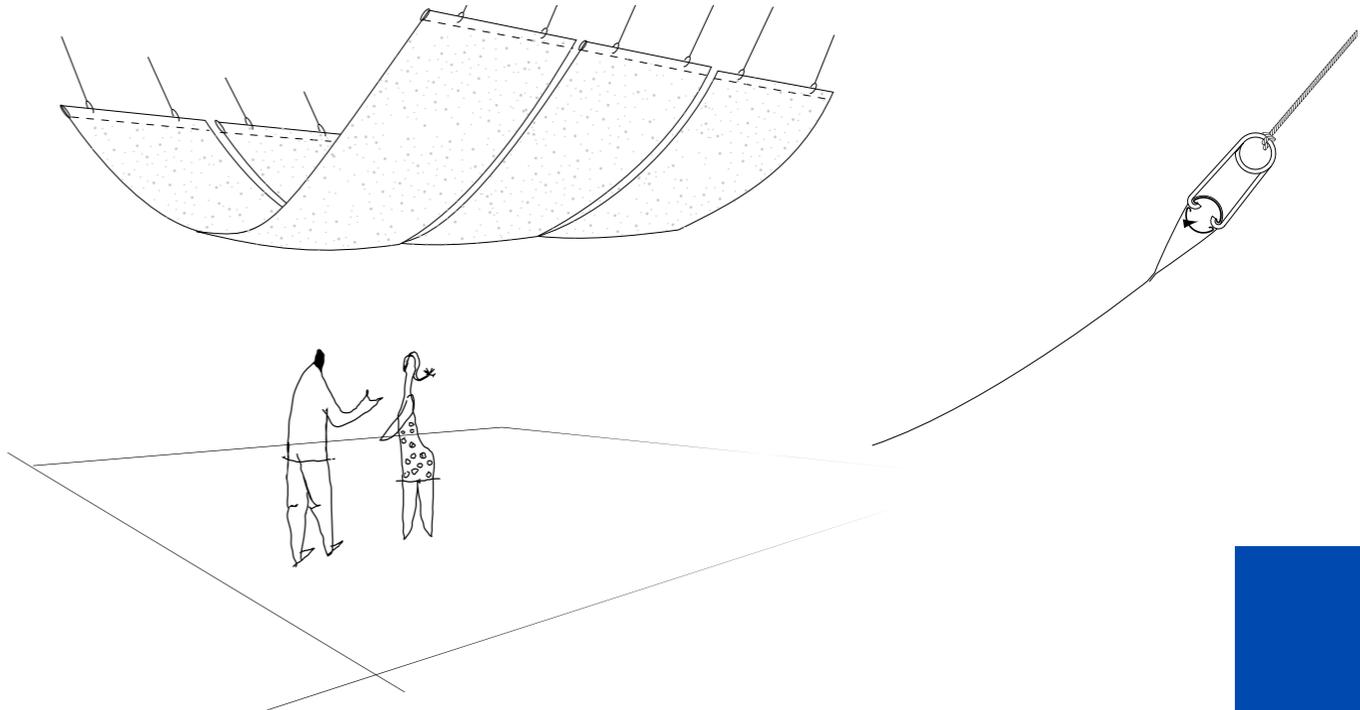

# DROP<sup>®</sup> GONDOLA in width

## The high tension paper

Drop Paper stripes are simply hung to upper frame or structure by means of aluminium tube in a simple hem.

The vault will be custom made depending on the width of the upper structure and the length of stripe.

molo is a Vancouver based design studio, dedicated to materials research and an exploration of space making. As a design and manufacturing company molo creates and distributes unique and innovative products to clients around the world. The design of molo products grows from Forsythe + MacAllen's architectural explorations, inspired by the idea that smaller tactile objects and elements can have a real potency in the physical experience of a space.

molo

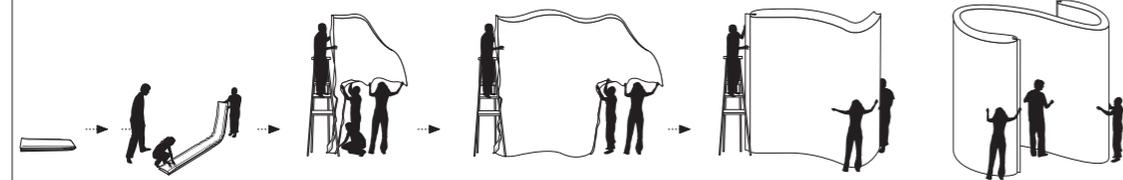

soft is a product line conceived of the desire to dynamically transform open space into more intimate surroundings, in a flexible and temporal way. soft is an evolutionary, materials research driven exploration of possibilities. The soft collection includes several variations of the softwall space partition, softblocks, softlighting and softseating.

**soft**

**textile softwall**

textile softwall expands from the thickness of a book (less than 50mm(2")) to form a translucent white or opaque black freestanding wall. It is made from a highly durable polyethylene non-woven textile which is tear, UV and water-resistant and 100% recyclable. All textile softwalls of custom and standard heights can be expanded and used in any curved freestanding formation between approximately 2000mm(6.5') and 5000mm(16.5') in length. textile softwall can be readily recompressed into a compact sheaf, folded in half and stored away like a blanket.

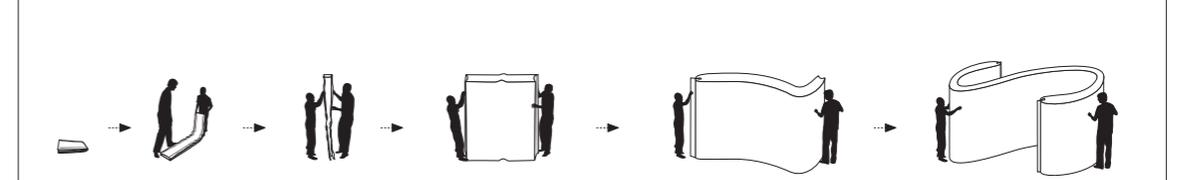

product		dimensions tall x wide	colour	product code
textile softwall		1830mm(6') x 305mm(12") <i>ships in box 910mm(36") x 380mm(15") x 150mm(6")</i> <i>weight: 9.5kg(21 lbs)</i>	white black	SWT-S6W SWT-S6B
		2285mm(7.5') x 455mm(18") <i>ships in box 1220mm(48") x 510mm(20") x 150mm(6")</i> <i>weight: 16.3kg(38 lbs)</i>	white black	SWT-S7.5W SWT-S7.5B

custom height textile softwall		up to 3050mm(10') x 455mm(18") <i>ships in box 1520mm(60") x 510mm(20") x 130mm(5")</i> <i>weight: 22.7kg(50 lbs)</i>	white black	SWT-C1W SWT-C1B

**soft**

**paper softwall**

paper softwall expands from the thickness of a book (less than 50mm(2")) to form a translucent white or opaque black freestanding wall. It is made from a lightweight, fire retardant tissue paper, granting it an airy delicate beauty, yet surprising strength and is 100% recyclable. All paper softwalls of custom and standard heights can be expanded and used in any curved freestanding formation between approximately 2000mm(6.5') and 5000mm(16.5') in length. paper softwall can be readily recompressed into a compact sheaf, folded in half and stored away like a blanket.

\* Also available with magnetic ends as part of softblock system of modular building blocks, please inquire.

## soft

### textile softblocks

textile softblocks are a modular system of building blocks with embedded magnetic connectors, available in the same translucent white or opaque black polyethylene non-woven textile used in textile softwalls. softblocks can be used one at a time or stacked and joined together like giant stretchy lego blocks. Each textile softblock can be expanded into any curved freestanding formation between approximately 2000mm(6.5') and 4000mm(13') in length. If you use the magnetic connectors of textile softblocks to anchor one or both ends of each softblock to other softblocks or any fixed steel surface you can stretch the usable length up to approximately 6000mm(19.5'). Functional load bearing surfaces can also be formed as niches within a wall or along the top of a single softblock.

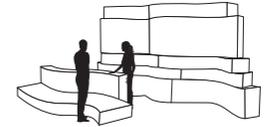

product		dimensions tall x wide	colour	product code
textile softblocks 30cm(12") wide		305mm(1') x 305mm(12") <i>ships in box 330mm(13") x 330mm(13") x 50mm(2")</i> <i>weight: 1.8kg(4 lbs)</i>	white black	SBTM-1W-12 SBTM-1B-12
		610mm(2') x 305mm(12") <i>ships in box 640mm(25") x 330mm(13") x 50mm(2")</i> <i>weight: 3.6kg(8 lbs)</i>	white black	SBTM-2W-12 SBTM-2B-12
		915mm(3') x 305mm(12") <i>ships in box 940mm(37") x 330mm(13") x 50mm(2")</i> <i>weight: 12 lbs(5.4kg)</i>	white black	SBTM-3W-12 SBTM-3B-12
		1220mm(4') x 305mm(12") <i>ships in box 1250mm(49") x 330mm(13") x 50mm(2")</i> <i>weight: 6.8kg(15 lbs)</i>	white black	SBTM-4W-12 SBTM-4B-12

## soft

### kraft paper softblocks

kraft paper softblocks are a modular system of building blocks with embedded magnetic connectors, available in the same opaque colours of black or natural unbleached brown as kraft paper softwalls and kraft paper softseating. The stiff heavyweight, fire retardant paper used is made from 50% recycled content and is 100% recyclable. softblocks can be used one at a time or stacked and joined together like giant stretchy lego blocks. Each kraft paper softblock can be expanded into any curved freestanding formation between approximately 2000mm(6.5') and 5000mm(16.5') in length. If you use the magnetic connectors of kraft paper softblocks to anchor one or both ends of each softblock to other softblocks or any fixed steel surface you can stretch the usable length up to approximately 6000mm(19.5'). Functional load bearing surfaces can also be formed as niches within a wall or along the top of a single softblock.

**soft**

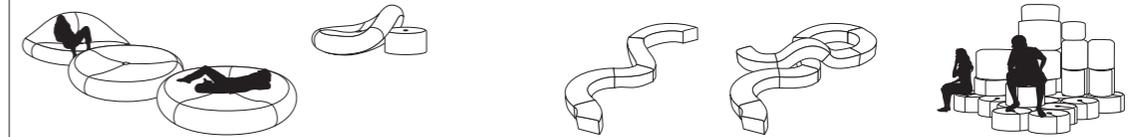

**kraft paper softseating** paper softseating is made entirely from heavy weight kraft paper, and all elements utilize a flexible honeycomb structure to fan open into stools, benches and loungers. Each of the sizes and types of softseating can compress like a big book for storage. Paper softseating can be used creatively and interchangeably as seating or as low tables, and the elements can even be stacked and overlaid playfully as building blocks to create unusual seating landscapes.

**soft**

**textile softseating** textile softseating is available in the same modular forms and dimensions as paper softseating, but is made from a water-resistant polyethylene-based non-woven textile material. This is a heavier version of the same translucent white polyethylene non-woven textile used in our textile softwalls and textile softblocks. Like the paper version of softseating, each of the flexible honeycomb units has magnetic end panels allowing any two or more of the same size to be connected, opening up endless possibilities for shaping long winding benches and seating topographies. The flexible nature and large diameter of the fanning loungers allows them to be leaned on top of one another or against walls to create uniquely contoured shapes with backrests.

# LIGHT COLUMN

By Procédés Chénel® International

## Express set up

Transparent structure with light inside, covered with a changing graphic.

Height available :  
35 cm – 1,00 m – 1,17m – 2,00 m – 2,35 m  
(1,2 ft – 3,2 ft – 3,8 ft – 6,5 ft – 7,7 ft)

The background of the image is a close-up, artistic rendering of a lighting fixture. It features a complex, layered structure of overlapping, petal-like or leaf-like elements. The colors are a mix of soft, muted blues, purples, and greys, with some areas appearing slightly more illuminated than others, creating a sense of depth and texture. The overall effect is reminiscent of a flower or a cluster of leaves.

HORTENSE

Petals of Drop
